

## Haumiller to Exhibit at NPE 2012

At Haumiller, we strive to integrate ourselves with our customers and their world. To connect with plastics processors who can benefit from high speed automated assembly machinery, Haumiller will exhibit this year for the first time at NPE, the international plastics showcase.

Many plastics processors are adding in-house operations, including assembly, in an effort to consolidate supply chains. At NPE, Haumiller will demonstrate the advantages of using custom automated assembly machines, which are adaptable to a range of applications and production environments.

Designers and engineers at plastics companies can benefit by working with Haumiller's automation experts early in the product development process. Upfront collaboration not only ensures standards and specifications are met, but also maximizes product output speeds, quality and cost effectiveness.

Visit Haumiller at NPE 2012:

- **Booth 46020**, in the Advanced Manufacturing section of the technology pavilion in the North/South hall
- April 1-5, 2012, at the Orange County Convention Center in Orlando, Florida

NPE 2012 is a triennial event produced by Society of Plastics Industry (SPI). The last show, in 2009, had 1,851 exhibitors, 33% of whom were from outside the US; 45,000 people from 19,000 companies in 101 countries registered in 2009. 2012 is on track to be an even bigger year than 2009; as of February of this year, there are over 7,600 companies attending so far.
